HARDING PLANS COMPLETE REST IN TEXAS CITY

No Conferences With Mexicans or With European Powers Are in Prospect

(By Associated Press)
ABOARD HARDING'S SPECIAL TRAIN, Nov. 8.—Coming to Texas after his trying campaign, Senator Harding declared he would put aside thoughts of coming responsibilities and enjoy a rest of two weeks. The fact that at Point Isabel he will be only six miles from the Mexican border has caused whisperings of a possible conference between Harding and representatives of the new regime in Mexico. Harding said no conferences were in prospect, and he took the same attitude toward suggestions that they might begin before his inauguration, in informal conversations with European governments regarding an association of nations. It is understood that several men representing themselves as spokesmen of foreign countries, had attempted interviews at Marlon, but headquarters said these were repudiated.

(By Associated Press)
NEW YORK, Nov. 8.—Harding will sail from New Orleans on November 15 for the canal zone aboard a United Fruit steamer, returning to Norfolk on December 4. The party numbers 25 persons.

HIGHLAND OIL TO DRILL SOON

Word has been received by The Bonanza from William Nance, associated with the Highland Oil company of Nevada, with headquarters at Quincy, California, who says the Highland company will not doubt be financed sufficiently to start operations at Oil Basin within the next few weeks, and that everyone connected with the company is working hard with a view to getting started before the entrance of winter.

This will be the first company to operate in this region, which is one place in Nevada where crude oil is available in the surface shale. Some effort has been made to finance other companies to drill there recently, but apparently without any tangible results.

According to latest geological reports, the White River district presents excellent indications for a vast oil field. Only drilling will determine the oil and being a virgin region, the oil outfit to strike oil should have the greater advantage.

WIFE OF KING WANTS PROPERTY

ATHENS, Greece, Nov. 8.—The question of legal rights of Madame Manos, morganatic wife of the late King Alexander, is likely to create a difficulty, according to jurists. Her attorney on Thursday asked the court to remove the seals on the apartments of the dead king, asserting that Madame Manos, through her marriage and approaching motherhood, should legally inherit Alexander's property. The attorney for former King Constantine declared that Constantine would contend the marriage was invalid.

EFFORT MADE TO SPEED UP MAILS

(By Associated Press)
NEW YORK, Nov. 8.—Restoration of the sea post to sort America's mail during its voyage from foreign lands is being considered by the efficiency engineers employed to investigate the entire post office department with a view to speeding up its work.

Before the war post office employees traveled on all mail-carrying steamers, sorting and routing letters and packages during the trip. Government vessels met the big ships at quarantine and rushed the pouches to railway terminals here and in Jersey City but this has been discontinued. Now mail arrives unsorted hours after arrival at quarantine.

STATE LIVESTOCK LAW IS PRINTED

The state board of stock commissioners is mailing out a 105-page summary of "Laws of Nevada Directly Applicable to the Livestock Industry." This summary is going to all ranchers and livestock growers in the state. For some time it has appeared that such a book was a necessity, since the board has been making stringent efforts to secure a better enforcement of laws designed for the protection of the industry. Statements made by various livestock raisers at different meetings of the Nevada Livestock Association have made it plain that very few private individuals, or even peace officers, have any very clear idea of the laws actually available for the protection of the livestock industry.

Williams, United States commissioner of internal revenue in Washington, to the San Francisco Chronicle, in response to a query regarding the statement that home manufacture of dry wines to the extent of 200 gallons would be permitted by the department of internal revenue.

NEVADA ELEVEN DEFEATS AGGIES

The University of Nevada continued its good football work Saturday by defeating the strong Utah Agricultural college team by a score of 21 to 0. The game was fast and hard-fought throughout, but the Nevada goal was in danger only once, and that time due to fumbles.

The first half was scoreless, with Nevada apparently content to hold the lighter Mormon team, but in the second half the sagebrushers opened up a series of forward passes against which the Utah team had no defense. In the third quarter Nevada scored once, and twice more in the last period of the game.

The day had been designated as Homecoming day, and a large number of former students of the university witnessed the game. Saturday's contest is the last one of the season on the Reno grounds, the remainder of their schedule calling for games away from home. During the holidays the team will go to Honolulu for two games with colleges of the islands.

FOUR BILLION ESTIMATE FOR GOV'T EXPENSES

Sharp Fight Expected in Congress When Democratic Program Comes Up

(By Associated Press)
WASHINGTON, D. C., Nov. 8.—Estimates are being prepared by the government departments for presentation to congress to make appropriations for the first fiscal year of the Republican administration. These will be submitted December 6.

Sharp exchanges are expected by the Republican house and senate, as the estimates are based on the Democratic program. Plans of the navy, it has been repeatedly stated by Daniels, must be the most powerful in the world, if a member of the league of nations. Estimates of all departments are expected to exceed \$4,000,000,000, including amounts for refunding portions of the debt due.

Harding is expected to call a special session after March 4, to which some of the appropriations may go over.

Estimates of the war department are based upon requirements of the army the size of which has already been fixed by a Republican congress.

H. S. TEAM MAY GO TO BISHOP

The high school football team is scheduled for a game with Bishop High at Bishop on Saturday of this week at 11 a. m.

Bishop is having a three-day celebration of Armistice day and the football game is scheduled as one of the big attractions of the last day of the celebration. Whether the Tonopah boys will be able to make the trip will necessarily depend on the weather maker. It is understood that the Bishop team had difficulty in getting back to Bishop after the game here a week ago. Since then much snow has fallen in Tonopah, and if that means heavy snows in the White mountains it may be that the roads are impassable. An effort will be made to learn the exact condition of the roads within the next day or two.

The Victory medals have arrived in the city and will be distributed on that evening and the men who receive them are requested to wear them during the affair. According to officials of the local post, there are still quite a number of men in this community who have not applied for their medal. Every man who served in the armed forces of the nation during the war is entitled to one of these medals and should apply at once.

The best music obtainable has been secured for the dance and everything points to one of the most brilliant affairs of the social season. Tickets may be secured from any member of the Legion or of the auxiliary.

Mr. Graber formerly owned a ranch in Elko county but sold it several years ago and since coming to this city has worked as a teamster for the Wittenberg Transfer Co. for the past year had been employed by the railroad. ATTEMPT TO COVER CASE UP CHARGED

Judge Declares Attorney-General Is Trying to "Hame-string" Coal Case

(By Associated Press)
INDIANAPOLIS, Ind., Nov. 8.—A request that the government conspiracy case against 125 bituminous coal miners and operators be continued was made when called in district court today. Judge Anderson immediately started an investigation of Attorney General Palmer's connection with the case, declaring he was going to find out whether the attorney general could "hamstring" the case.

Palmer's orders not to use certain evidence in the soft coal conspiracy cases against 125 operators and miners were interpreted as possibly nullifying the government's case, the government attorneys testified before Judge Anderson. The case was continued to January 19.

In setting January 19 as the date for the trials, Judge Anderson declared that meanwhile he would "at least find out whether we are governed by law or by person." His remark apparently was intended to reply to Palmer, whose actions, the judge asserted, were "strangely close to compounding felony" and "dangerously near contempt of court." It also was indicated by the judge that the federal grand jury would reopen the investigation of the coal conspiracy cases.

(By Associated Press)
PEORIA, Ill., Nov. 8.—The Illinois defendants in the coal conspiracy cases in the United States court at Indianapolis lost the case in federal court today in which they sought to enjoin officers of the government from removing and prosecuting them in Indianapolis on the ground that section nine of the labor act was unconstitutional.
